Day 1

Itinerary

With artifacts that date back to the predynastic periods, Elephantine Island is one of the most ancient sites in Egypt. Spend a few hours with [Your Egypt Tours](#) exploring the largest island in the region, which has an important role in Egyptian history. Elephantine Island is the largest of the Aswan area islands and is one of the most ancient sites in Egypt, with artifacts dating to predynastic periods. This is probably due to its location at the First Cataract of the Nile, which

provided a natural boundary between Egypt and Nubia. As an island, it was also easily defensible. The ancient town located on the southern part of the island was also a fortress throughout much of its history.

At one time, there was a bridge from the mainland to the island. Elephantine is Greek for elephants. In ancient times, the Island, as well as the southern town, was called Abu, or Yabu, which also meant elephant. The town has also been referenced as Kom, after its principal god of the island, Khnum (Khnemu). It is believed that the island received its name because it was a major ivory trading center, though, in fact, it was a major trading post for many commodities. There are large boulders in the river near the island which resemble bathing elephants, particularly from afar, and this too has been suggested as a reason for the island's name.

Please note: In the event of strong Nile currents, travel will be by motorboat rather than felucca to ensure safety.

tour.included

Qualified Egyptologist guide

Entrance fees

Hotel/port pickup and drop off

Transport by air conditioned minibus

Exclusion

Gratuities (recommended)

Food and drinks, unless specified
